Softapps

Open ERP
OPEN SOURCE MANAGEMENT SOLUTION

Open ERP has been specifically designed to help businesses improve their performances and is committed to Open Source Business Model. OpenERP is a comprehensive suite of business applications expanding to all kinds of different areas. Open ERP is known to be very complete and extremely modular allowing customers to start with one module and add other module later on. Customers keep the benefits of integrated software but avoid a "big bang" project. The absence of license fees makes OpenERP very affordable.

We provide you complete turnkey solution to your enterprise resource planning. It includes OpenERP consulting, OpenERP development, OpenERP Support and OpenERP implementation services which provide significant benefits over proprietary software including customizability, scalability, ease of use and low total cost of ownership. We have experts to provide a complete turnkey ERP solution right from selection of server hardware to maintenance and upgrades.

Our services include |

- OpenERP Implementation
- New module creation
- Modification of existing modules
- OpenERP SAAS
- OpenERP Training
- Integration with legacy applications
- Integration with Magento e-commerce platform
- Data Migration from existing systems to OpenERP
- Open ERP Maintenance and Support
- Customization of standard modules

IT Infrastructure Planning & Implementation

Virtualization Technology Services | Servers & Desktop

Many IT organizations are tasked with reducing their overall spending costs for technology while improving service to their clients. The Softapps Consulting Services (SCS) team understands the solutions on the market that allow IT to do more with less and these tools and processes are at the core of our virtualization and optimization services offerings. Softapps Consulting Services has been able to combine Assessment, Planning, and Design services into one simple package with one fixed fee. The result is that we are able to deliver cost savings and efficiencies to our customers on a consistent basis with the following benefits:

- Faster time to developing a virtualization or optimization strategy based on best practices.
- Faster and more cost-effective delivery of virtualization and optimization services.
- Faster time to realizing the financial benefits of virtualization and/or optimization in your IT environment.

Network Security Services |

Every company faces some kind of Network Security risk or threat. Softapps delivers a simplified and comprehensive suite of Network Security solutions that address a broad range of security challenges. Our Network Security Services help clients protect their data and intellectual property, while remaining compliant with industry and government mandates. We help clients adopt security best practices which help defend networks from both internal and external threats.

Softapps Offers:
- Managed Server, e-mail security and web security services
- Network Security Design and Implementation

Data & OS Migration Services | Data Management Solutions

Whether you are looking at OS data migration, hardware migration, software migration or just data migration services in general, our experienced and knowledgeable IT technicians can help your organization instigate clear data migration solutions with zero downtime.

We will help you:
- Create and configure a migration roadmap that includes hardware, software and server capacities
- Plan OS migration, data migration and hardware migration, including backing-up your current system
- Move data from one storage platform to another
- Install and configure software system
- Restore and test new system

Data Center Services |

Data centers are constantly changing and growing due to business expansion, new IT initiatives and security procedures. Our IT data center analysis services will assess your current data center environment to identify a variety of possible data center IT solutions to improve your current infrastructure, while also looking ahead at capacity planning and growth considerations. Our data center services include a walkthrough of your environment and in-depth interviews with your key IT and facilities staff in order to create a Scope of Work roadmap that is tailored to each client's individual and unique business-related data center management needs.

Storage Solution |

To meet the end-to-end storage requirements of today's enterprise, Softapps extends its skills in identifying, configuring, implementing the storage solutions at optimal cost. Its alliances with major storage vendors like HP, IBM, Sun Microsystems, Veritas and Netapp gives Softapps the leverage to address the storage needs through a suit of storage solutions with regards to the conceivable hardware and software storage needs. We also offer storage solutions built on Open Source Storage Appliance Software like openfiler & Open Solaris.

Web Design and Development

Every company has a unique requirement when it comes to web designing. Our responsibility is to project that uniqueness and make the website stand out from its competition. We are specialized and have proven experience in designing the website. As a web design company we offer complete web design solutions, where our clients are benefitted to have all reciprocal solutions under a single umbrella. We are capable of providing high quality; cost-effective; mission-critical web designing solution. Our web designing ensures that your website is aesthetically appealing and user friendly. Our engagements can add value at any stage of a life cycle.
